Minutes from Previous Meeting

From the previous meeting, our group went over what exactly we did that week until the meeting point, detailing what we thought was better for this sprint, and what we wanted to actually include in the MVP for sprint 1. We also decided to rethink some of our previously stated APIs to use, since they were either not getting back to us, or they did not work as planned. We agreed to divide the work amongst ourselves from the sprint backlog again, as there were items we added after getting into the project and realizing what exactly needed to be done. However, we still agreed to stick with our designated roles as we thought it still suited our strengths and weaknesses the best the way we delegated them initially. That said, we will also be helping each other with any of the tasks if need be, even if they were not assigned to us. In total, our meeting was 15 minutes long. The next meeting date decided upon is 04/05/2022.
