API link to Detailed Page (Safety Features)	Brandon, Roshin
Polish up site	Lily, Brandon, Roshin
Make sure Heroku does not give any more errors	Brandon, Roshin
Work on final presentation	Lily, Brandon, Roshin

## Minutes from Previous Meeting

From the previous SCRUM meeting, we discussed our progress with the final product, including what information we are pulling from the APIs and how we wanted to display them, as well as the accessibility feature and completing all the other pages. For the API information, we had listed them all as per our first SCRUM meeting, but now having them listed, we finalized which pieces of information we wanted displayed for our users to see. For the accessibility feature, we managed to get it working across all of the pages. However, there was a slight issue with the formatting that we needed to fix because of this. We planned on fixing this before our next SCRUM meeting. As for the other pages, we all looked over the progress and agreed that only the search history page needed to be modified further. In total, our meeting was 20 minutes long. Originally, our SCRUM meeting schedule had the next meeting scheduled for 05/01. We decided to push our last SCRUM meeting to the afternoon the materials for sprint 3 are due just to give another day for progress before finalizing our final product. The next meeting date decided upon is 05/02/2022.
