Minutes from Previous Meeting

From our last SCRUM meeting, we went over what we had done since the second SCRUM meeting and what we still need to finish. Currently, we are still on track, but we agreed that we should work slightly faster so that we can finish at least most of our sprint backlog goals, if not all of them. Since we changed some of our API data points to collect and our accessibility feature, we made sure to update the logs and each other about the progress and moving forward we agreed to make a list of all the features: currently in place, will implement by the end of the day, and are considering on implementing in the future. We also discussed needing to commit more to GitHub than our previous sprint, and making sure we follow the correct procedure for pulling and merge requests. In total, our meeting was 13 minutes long. The next meeting date decided upon is 04/19/2022.
